Giving thanks during your internship/job search process

Since it’s Thanksgiving week we felt it was appropriate to talk about giving thanks. We were taught at an early age to say “please” and “thank you.” This practice can become more of a common courtesy than an expression of genuine gratitude.

Related: 7 times when you should just say thank you but you don’t

By expressing more gratitude in your life, you will contribute tremendously to your level of success in your future career in engineering. It shows that you do not take anything for granted. Hopefully, you are grateful for the opportunity to obtain a degree in a field that you chose to pursue.

Many of you are in the process of securing an internship or job in your field of study. An even if you have not secured your dream job just yet, you can certainly be grateful for the opportunity to do so. Just keep putting in that extra effort to reach your career-minded goals
